

The Department of Psychology at Durham University seeks to appoint up to eight talented individuals to the role of Assistant Professor across multiple recruitment calls this year. In the current call, we welcome applications from those with research and teaching interests in the broad field of Cognitive Neuroscience. We are particularly eager to hear from applicants with a focus on perception, action or multisensory integration, learning and memory, or clinically relevant research areas, and those working with imaging or neurostimulation methods (ie fMRI, EEG, TMS), or rodent models of cognition. We welcome applicants whose work would extend our Cognitive Neuroscience research and MSc teaching in novel directions, as well as those whose research can forge new links between Cognitive Neuroscience and our other research groups, Developmental Science and Quantitative Social Psychology.

This post offers an exciting opportunity to make a major contribution to the development of internationally excellent research and teaching while allowing you unrivalled opportunities to progress and embed your career in an exciting and progressive institution.
