

Mini conference FENS Forum of Neuroscience Glasgow 2020

“Behavioural neuroscience for the next decade: Why behaviour matters to brain science”

Saturday 11th July 2020 (08:30-15:00)

The European Brain and Behaviour Society (EBBS), European Behavioural Pharmacology Society (EBPS), European Molecular and Cellular Cognition Society (EMCCS) and International Behavioural and Neural Genetics Society (IBANGS) invite you to our jointly organised mini conference. A variety of topics will be covered, focussing on the role of behaviour in Neuroscience and the translatability of animal models to human traits and psychiatric disorders. There will be four themed sessions with talks from rising stars in our field, followed by a round table discussion. Our mini-conference is a rare event bringing together our four societies, established leaders and early career researchers from the behavioural neuroscience community for a day of amazing science and networking opportunities. Supported by the FENS Forum, our mini-conference will take place directly before the opening of the biannual meeting in Glasgow so that participants can use this event as a taster for the FENS FORUM meeting and continue to discuss this important topic during the meeting.

Programme Overview:

09:00-09:15 Welcome/introduction to the mini-symposium
09:15-10:00 Progress in complex behavioural analysis
10:00-10:45 How pharmacology and neuroscience help us to understand behaviour
10:45-11:15 Coffee/tea break
11:15-12:00 Molecular and Cellular Mechanisms of Learning and Memory
12:00-13:00 Lunch
13:00-13:45 Connecting Genes to Behaviour
13:45-14:45 Round table discussion “The value of behaviour: the balance between basic science and translational research” (Panel Chair: Wim Crusio)
14:45-15:00 Concluding statements
