

## **Newsletter September 2020**

### **✓ October 5<sup>th</sup> Deadline: Call for Symposia for the 49th EBBS meeting in Lausanne (4-7 September 2021)**

The EBBS program committee welcomes excellent symposia that advance our knowledge of the brain and behavior, in health and disease, and using all research approaches. Excellent proposals covering either a hot topic in the field or a novel topic not represented in previous EBBS meetings will be favoured.

A symposium may be proposed by any established researcher, who did not have a symposium proposal accepted at the EBBS 2019 meeting (previous speakers who did not propose a symposium are eligible). Members of the Program committee can neither propose a symposium nor be speakers in a symposium. Proposers of successful symposia would be expected to be or become full members of the EBBS.

Each symposium will require a chair and four speakers (the chair may be one of the speakers). Preference will be given to proposals that represent diversity (across age, sex, and origin).

Note: We are aware that the current situation with COVID-19 may lead to some uncertainty for speakers at this stage. Alongside our preferred plans for a conference we can all attend in person, we are preparing plans for the meeting to be held virtually or as a hybrid meeting if needed. We hope that symposium proposals can therefore be submitted with confidence.

Please complete the EBBS symposium proposal form on the conference website (<https://www.ebbs2021.org/call-for-symposium-proposals/>) by October 5th 2020

Any questions please email [secretary@ebbs-science.org](mailto:secretary@ebbs-science.org)
